Guide to Bosch Dishwasher Cycles & Options

With a variety of cycles and options to choose from, we have a cycle to fit your customer's dishwashing needs.

Dishwasher Cycles:

Heavy: Best for cleaning items with baked-on food or grease. These dishes would normally require soaking.
Cycle Time: 110-135 min. *Wash Temperature:* 150-160°F.
Rinse Temperature 162°F

Auto: With our most complex soil sensing capability, this cycle is perfect for use with mixed loads of dishware and varying amounts of food soil. This is the most flexible cycle and is a good choice for everyday use.
Cycle Time: 110-135 min. *Wash Temperature:* 150-160°F.
Rinse Temperature 162°F

Normal: Thoroughly cleans a full load of normally soiled dishes. *Cycle Time:* 130-135min. *Wash Temperature:* 131°F.
Rinse Temperature: 140-156°F

Speed60™: Cleans freshly soiled dishes with easy to remove soils. This cycle reduces cycle time while still including drying. *Cycle Time:* 60 min. *Wash Temperature:* 122°F. *Rinse Temperature:* 158°F

Rinse: Allows you to rinse food soil off of a partial load and hold the dishes in the dishwasher until you are ready to run a full load. Do not use detergent in this cycle.

Glass: A cycle for lightly soiled dishes, ideal for temperature sensitive items or cutlery. In this cycle the temperature is reduced to help prevent dishes from becoming damaged. It is especially helpful to reduce a cloudy or etched appearance on glasses.

Express: Cleans lightly soiled dishes and reduces overall wash time. Use this cycle to clean glasses and dessert dishware that may need to be reused at the same event. *Cycle Time:* 30 min. *Wash Temperature:* 113°F. *Rinse Temperature:* 122°F

Eco: Best for delicate dishes and glasses, the Eco cycle lowers temperature and cycle length to decrease energy usage. *Cycle Time* 80-85 min. *Wash Temperature:* 113-122°F. *Rinse Temperature:* 144°F

Dishwasher Options:

Sanitize: Available only in the Heavy, Auto and Normal cycles. The sanitize LED will light when sanitation requirements are met. The technical sanitation measures may also improve the drying results.

Delicate: Available only in the Heavy, Auto and Normal cycles. This cycle is best used for lightly soiled items with easy to remove food soils.

SaveTime: Reduces cycle time by up to 25% while maintaining cleaning performance.

ExtraShine™: Used in combination with a wash cycle (except Rinse), the Extra Shine option raises the temperature and extends the drying time to further enhance drying results and provide a brilliant shine.

Half Load: For washing small, lightly soiled loads that fill approximately half of the dishwasher's capacity. Dishes can be placed on all levels of the dishwasher.

Delay: Allows you to delay the start time of your dishwasher up to 24 hours.

Tip: For best drying results, we recommend: Auto cycle, using a Rinse-aid, and either Sanitize or Extra shine option

Exclusive features

Duo-Flex

Removable silverware basket can be split in two and placed anywhere in the dishwasher, offering ultimate flexibility.

Knife Rack

Reduces risk of getting injured because sharp-edged cutlery can be safely loaded and offers more space because of an additional rack.

Speed60™

An entire load of dishes: From dirty to dry in about 60 minutes.

Other innovative features

Extra Shine

Add to any cycle for increased dish shine.

24/7 Overflow Protection

Automatically shuts down operation if a leak is sensed. It even works 24/7 and can turn itself on.

24/7 AquaStop® System

Works similar to the 24/7 Overflow Protection but includes a fully enclosed base underneath the dishwasher for added protection.

* Excludes Ascenta models: SHX3AR5_UC, SHE3AR5_UC, SHX3AR7_UC, SHE3A75_UC **SHX/P/V only ***Polypropylene
