

This Month: *New 500 Series Dishwashers*

Bosch dishwashers are well known for their legendary quiet, but that's only the beginning. Flexible loading features and more handle design offerings make the 500 Series a great fit for many customers.

Pocket handle option

For consumers who prefer a flush, unobtrusive look, the 500 series is the starting price point that offers our most beloved handle, the pocket design. This series provides the perfect opportunity to step up consumers from the 300 series if they prefer this design option.

Bar handle option

Originally introduced by Bosch to the U.S. market, this traditional dishwasher look has a sturdy handle that's easy to grasp. Available on the 800/500/300 Series.

Flexible 3rd Rack

Expandable wings easily lower to accommodate more of your deeper items, while adjustable tines let you customize the rack's loading space to fit awkward or bulky utensils.

EasyGlide™ Rack System

Pulling out a heavy loaded upper rack is no longer a daunting task. The ball bearing wheels on the upper rack create a smooth and effortless loading and unloading experience.

FlexSpace™ Tines

This convenient new feature lets you fold back every other tine in one simple step, so it's easier to fit your largest, bulkiest items. It helps to hold pots and pans upright, leaving more room for other dishes.

RackMatic® adjustable middle rack

This remarkable middle rack easily raises or lowers in just one step, even when full. Designed to allow taller items like stemware to fit in the middle rack while leaving room for pots and pans below, it offers three different heights and up to nine separate rack positions.

24/7 AquaStop® Plus

Solid, molded base, double walled electro valve hose and sensors that can detect leaks and automatically shut off the water inlet.

Ultimate drying performance

What is condensation drying?

All Bosch dishwashers use a condensation drying process. Instead of utilizing a heating element at the bottom of a dishwasher, condensation drying involves a number of dishwashing elements that work together to efficiently dry your dishes more hygienically than conventional air drying, and with minimal energy.

Here's how it works:

- The final rinse uses high-temperature water to make the dishes very hot.
- The stainless steel tub of the dishwasher cools faster than your dishes because stainless steel cools faster than glass and porcelain.
- Condensation occurs when the moist air in the dishwasher comes into contact with the cooler stainless steel tub, and turns into water droplets. These water droplets trickle down to the bottom of the dishwasher and are drained.

Benefits:

- Since it's a closed system with no fan, the cleaning process is more sanitary.
- With no exposed heating element, plastic utensils and dishes placed on lower rack will not melt.

For best results:

- Always use a liquid rinse aid.
- Select the Auto cycle.
- Press the Sanitize or Extra Dry option.
