OptiSim® Cap

Previous Cap OptiSim® Cap

- ◆ OptiSim® diffuses the heat with a thicker and bigger shape cap that spreads the flame across the bottom of the pot
- ◆ Flame sits under the lip of the burner cap
- ◆ Simmer delicate sauces by minimizing the risk of scorching
- ◆ Wider range of temperature control with better distribution of flames that helps prevent hot spots

New High Efficiency Burners

- ◆ New burners are more efficient and perform better when closer to the pot (improved high heat)
- ◆ With top breathing burners, low BTU rates will not be negatively influenced by cabinet pressures
- ◆ Air is drawn from above the cooktop. Eliminates the need to pull air from the cabinet
