

FlameSelect® Gas Cooktops

A better way to cook on gas

How FlameSelect® differs from conventional gas cooktops.

Precision heating

Achieve the exact flame power at each level, every time, with each of the pre-defined power levels.

Consistent, repeatable results

Love your pancakes or eggs a certain doneness? Simply use the same power level each time to achieve the exact same results, so there's no more guesswork.

Eliminate guesswork

No need to check flame height because it's now consistent each time.

FlameSelect® Gas Cooktops

Key Features

FlameSelect® – a better way to cook on gas

Nine precise power levels deliver accurate flame height at each level every time for consistent, repeatable results. There's no more need to check the flame height.

Dual-Flame Power Burner

The dual-flame power burner has 2 rings for low and high flame settings so you can go from simmer to sear with ease. Levels 1-3 use the inner ring, and 4-9 use both rings for maximum heat.

OptiSim® Burner

The OptiSim® burner (front left) has a specially designed thicker burner cap which allows for better control of the flame at the lowest setting for precise simmering and melting. The cap design also distributes heat better and helps prevent hot spots in the pan.

Easy to clean surface

Available in grey tempered glass or stainless steel with rounded edges, the low profile cooking surface is sleek and easy to clean.

Flame Safe safety mechanism

For added safety and peace of mind, the gas valve closes if the flame hasn't heated the burner. If the flame goes out, the gas is automatically shut off.

Residual Heat Indicators

Distinctive red LED light indicates if burners are on and flash if the burner is still hot after turning off the cooktop.*

*Light display varies by series.

Dishwasher-Safe Grates

With a special enameling process, the heavy-duty continuous surface grates can be easily and quickly cleaned in the dishwasher instead of by hand.

Display

Benchmark® models feature a red LED display that shows the burner power level.

Cooktops with a **LOW PROFILE** maintop now have a built in **HEAT SHIELD**.

These cooktops can be installed over an open drawer or cabinet without any additional requirements.
